

Food Allergies and Intolerances Statement

The School caters for those children with food allergies and intolerances. It is important to advise the School of these when joining.

Children in Years 3 - 6 with food allergies and intolerances are advised to speak to a member of the catering team when making their choice of what to eat. The catering team, in consultation with parents, are fully aware of all the children who have specific dietary requirements and therefore are able to give advice on which foods are suitable.

For those children below Year 3 the staff member will check with the catering team as to the content of the meals. The Pre-Prep staff take responsibility for ensuring that those children with food allergies and intolerances are given appropriate meals.

No nuts are used in any recipe within the kitchen, however, we cannot guarantee that there are no nuts in the School.
